The problem isn't finding a service. It's finding one you can trust.

TODAY, SERVICES ARE FOUND THROUGH

-  Word of mouth
-  WhatsApp groups
-  Random contacts & references
-  Unorganized local searches

WHICH LEADS TO

No centralized information

Every provider lives in a different place.

Unclear pricing

Rates vary by who you ask, or aren't known.

Limited reviews

Reputation is passed on by word of mouth only.

Uncertain availability

No visibility into slots before reaching out.

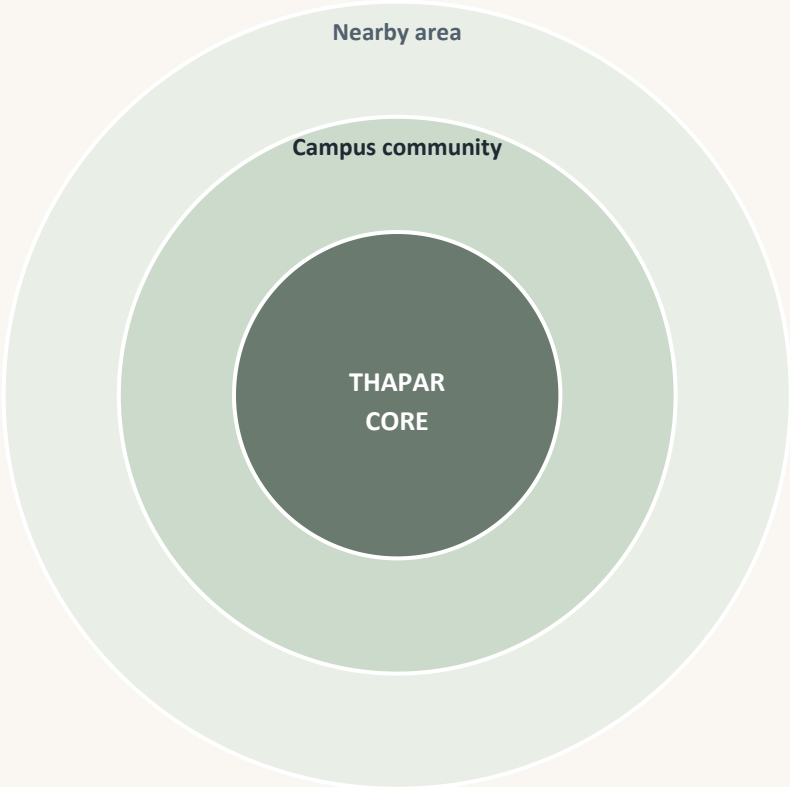

No doorstep convenience

Booking and tracking is manual and slow.

Starting focused: Thapar + nearby areas

We validate the model before we expand it.

PRIMARY

 Thapar students

 Faculty & staff

 Researchers

 Campus residents

SECONDARY

 Nearby residents connected to the Thapar ecosystem

WHY START HERE

- Geographically close
- Recurring demand
- Convenience matters
- Trust matters
- Providers already exist

People don't always want the cheapest option. They want the option worth paying for.

EXAMPLE · FRESH MILK DELIVERY

 **Regular**

₹60

/ litre

 **CityServe Premium**

₹75

/ litre

WHAT THE PREMIUM ACTUALLY BUYS

- Freshness
- Verified source
- Quality assurance
- Reliable delivery
- Doorstep convenience

The customer isn't paying for milk. They're paying for *Trust + Convenience + Quality + Time Saved.*

This becomes the core philosophy of CityServe: charge a fair premium for verified quality and convenience — not the absolute lowest price.

**Illustrative pricing example only — not actual market rates.*

CityServe — a trusted local-services marketplace

Two core functions, working together.

Directory / Discovery

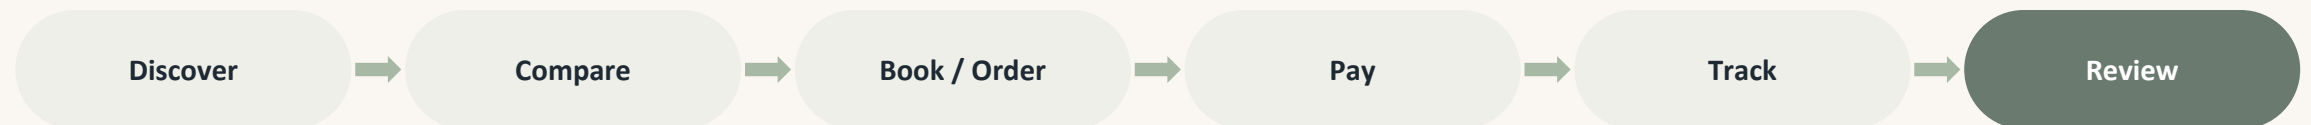

- Discover local providers
- Search services
- Compare providers
- View ratings
- Check pricing & availability

Marketplace / Transactions

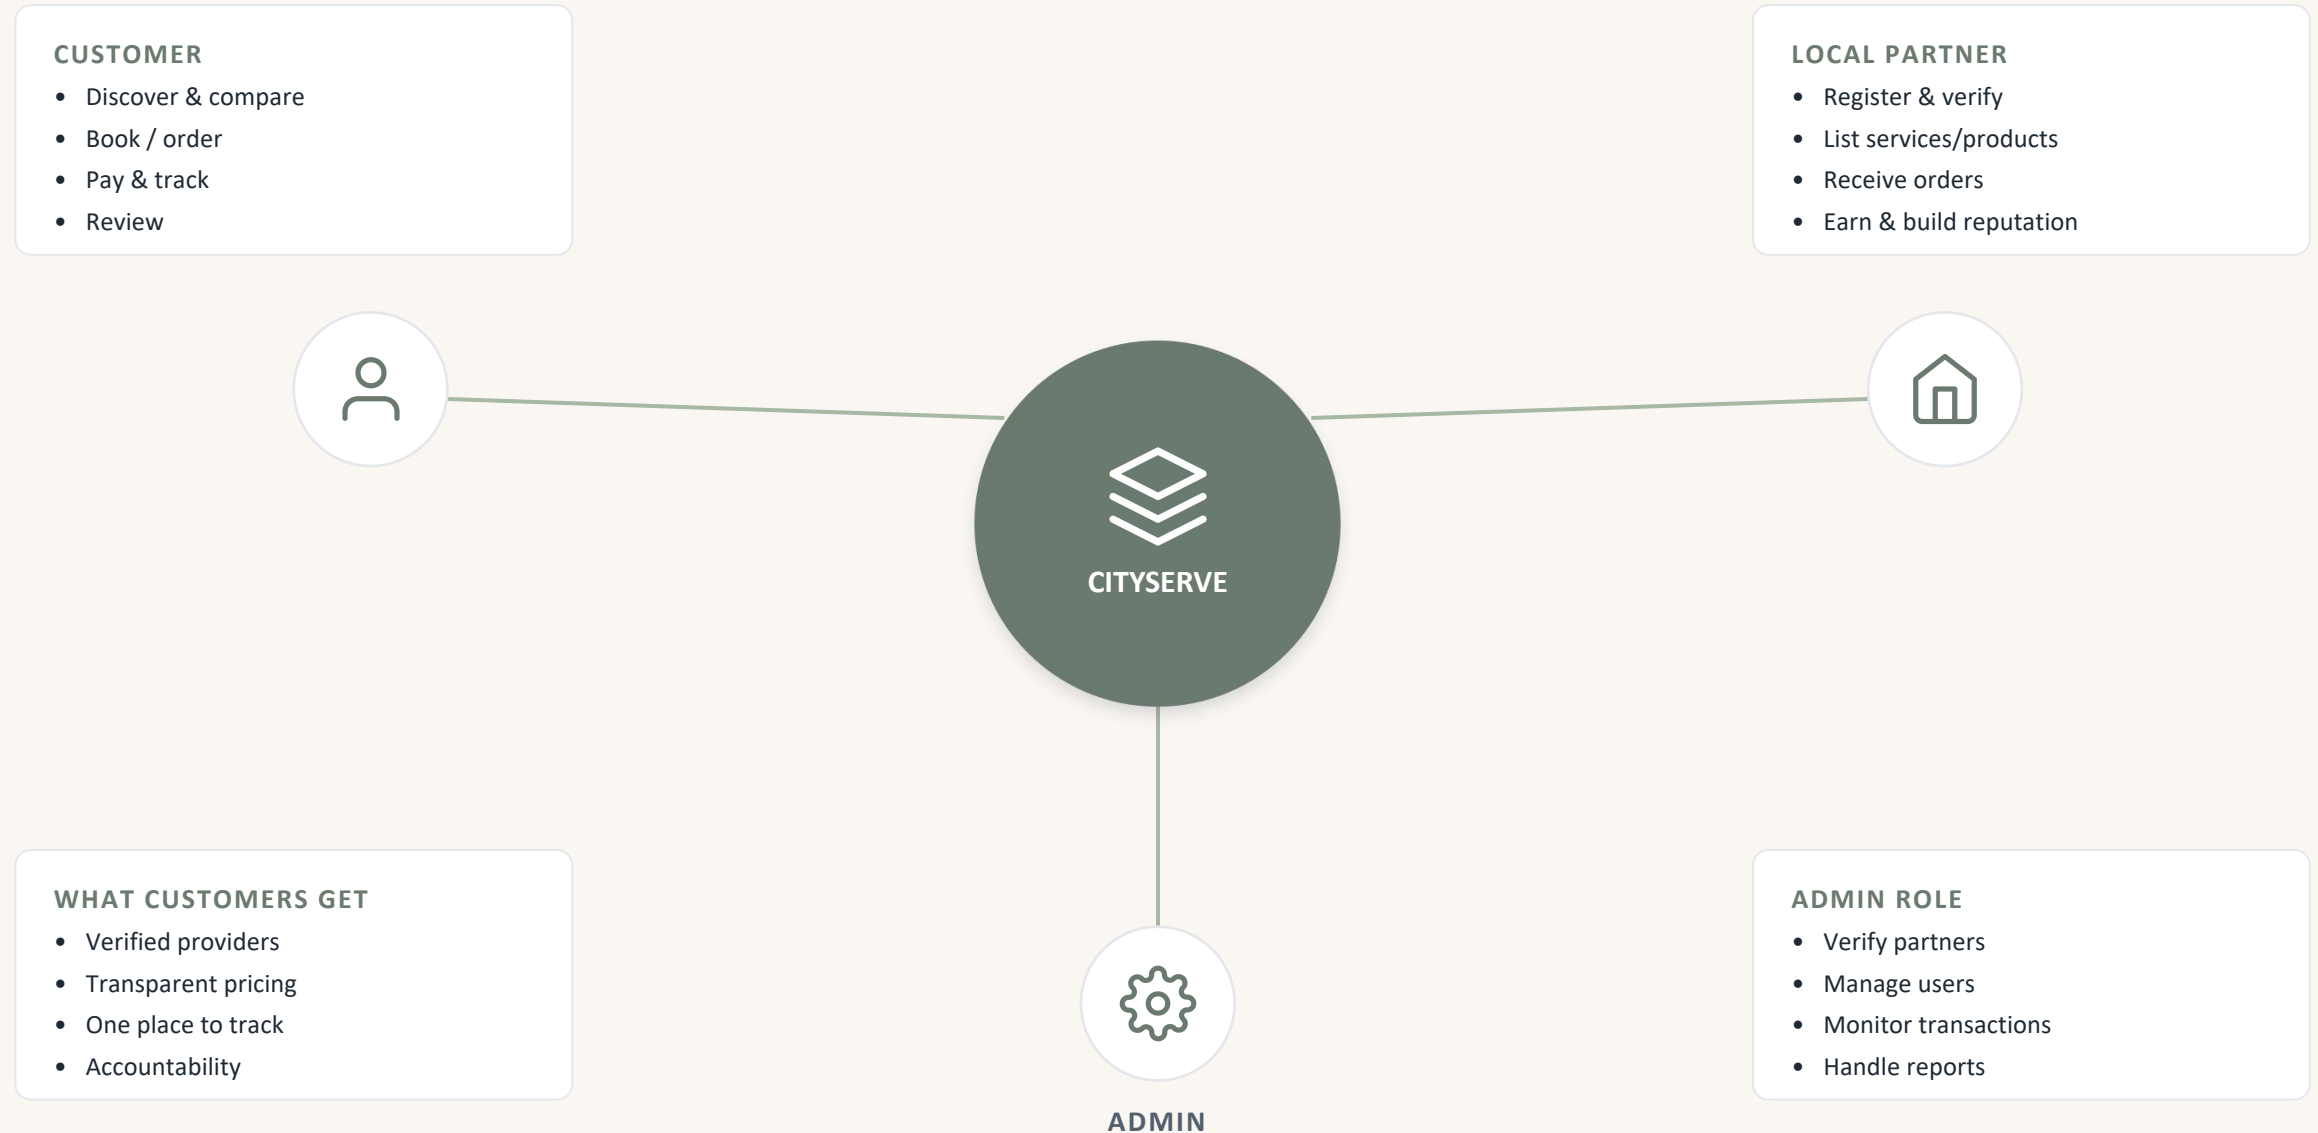

- Book services
- Order products
- Choose delivery/service slots
- Pay securely
- Track & review

CENTRAL FLOW

One continuous experience — not a listing site and a separate booking app.

More than a directory — a complete ecosystem

From everyday essentials to local professionals

Fresh Essentials

Milk, curd, paneer, fruits & vegetables

Food & Home Kitchen

Tiffin, home-cooked meals, bakery

Laundry & Clothing

Laundry, tailor, rafu, dyeing, ironing

Home & Repairs

Electrician, plumber, carpenter, appliance & laptop repair

Personal & Mobility

Salon, grooming, bike & car service

Education & Events

Tutors, photography, decorators, catering

Start focused, expand based on demand — the homepage highlights top categories; the full directory scales later.

Our MVP

Three journeys, one platform.

CUSTOMER

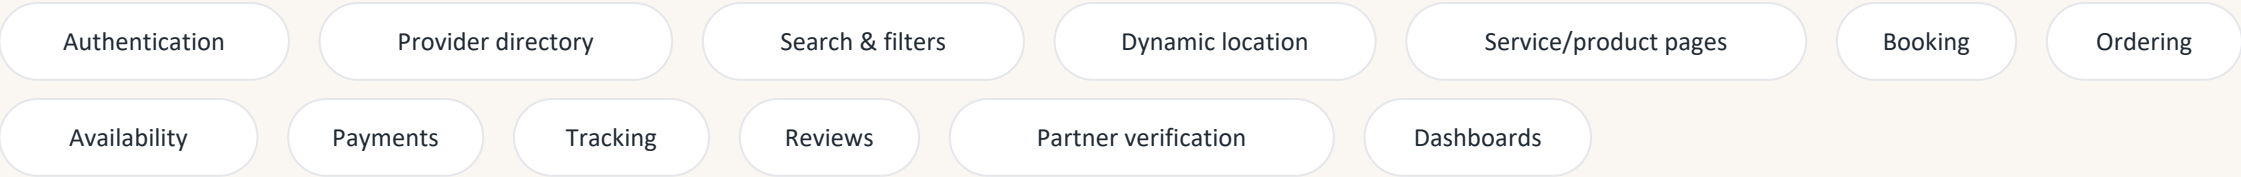

PARTNER

ADMIN

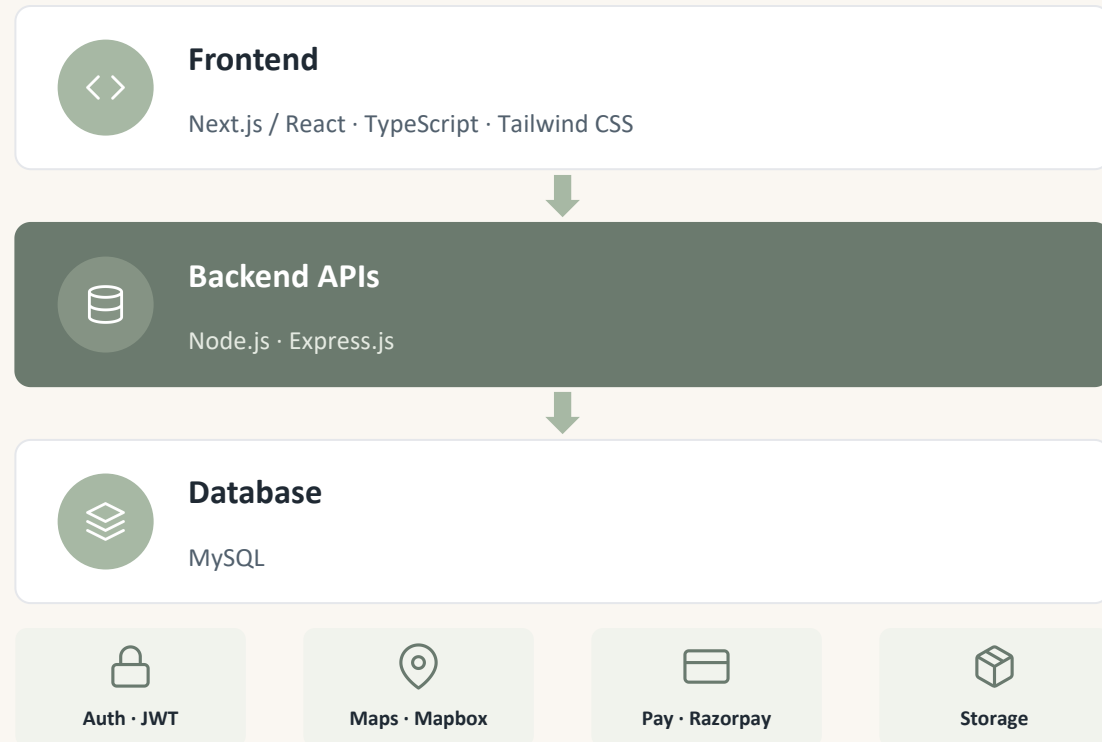

CORE MVP FEATURES

How we will build and sustain it

TECHNOLOGY & ARCHITECTURE

BUSINESS MODEL

- Commission per transaction
- Delivery / service fee
- Partner subscription
- Featured listings
- Premium membership

INITIAL FOCUS

Commission + service/delivery fee

From Thapar MVP to a scalable platform

PHASE 1

Validation

- Identify high-demand services
- Survey Thapar users
- Validate willingness to pay

PHASE 2

MVP

- Customer + partner apps
- Admin panel & booking
- Payments & tracking

PHASE 3

Thapar Pilot

- Launch selected categories
- Onboard verified partners
- Measure repeat usage

PHASE 4

Scale

- Thapar → other campuses
- → other communities
- → other cities

NEXT DELIVERABLE

Thapar-focused functional CityServe prototype

CityServe — *"Trusted local services, made convenient."*
